Portfolio: mutisyacollins.github.io/Portfolio

ATTACHMENT OBJECTIVE

Diploma in ICT Technician student at Railway Training Institute (RTI) seeking a 3–6 month industrial attachment in IT Support, Networking, Systems Administration, or Technical Operations. Brings 2+ years of hands-on freelance experience configuring networks, repairing computer hardware, troubleshooting software issues, and providing end-user support to 15+ residential and small-business clients across Nairobi.

TECHNICAL SKILLS

Hardware & Repair

- Computer assembly and disassembly
- RAM, SSD, PSU, and motherboard replacement
- Hardware diagnostics and troubleshooting
- Preventive maintenance and system upgrades
- Computer performance optimization

Networking

- LAN installation and configuration
- WiFi deployment and optimization
- Router configuration (TP-Link, Tenda, XPON)
- DHCP and Static IP addressing
- Network troubleshooting
- Basic network security implementation

Systems & Software

- Windows 10/11 installation and configuration
- Driver installation and updates
- Software deployment and maintenance
- Virus and malware removal
- Firewall and antivirus configuration
- System optimization

IT Support & Tools

- End-user technical support
- Printer installation and troubleshooting
- Microsoft Office Suite
- Command Prompt (CMD)

Web & Development Basics

- HTML, CSS & JavaScript
- Responsive UI development
- GitHub Pages deployment

PROFESSIONAL EXPERIENCE

Freelance ICT Technician & Network Support Specialist

Self-Employed | Nairobi, Kenya

2023 – Present

- Installed and configured LAN networks, WiFi systems, and internet connectivity solutions for 15+ residential and small-business clients across Nairobi.
- Configured TP-Link, Tenda, and XPON routers, including DHCP setup, static IP allocation, SSID configuration, and network security settings.
- Performed computer repairs and hardware upgrades on desktop and laptop systems, improving performance and extending device lifespan for clients.
- Diagnosed and resolved operating system faults, driver conflicts, and malware infections.
- Conducted clean Windows 10/11 installations and software deployments.
- Delivered remote technical support through AnyDesk and TeamViewer.
- Trained clients on router management, safe internet usage, and basic cybersecurity practices, reducing recurring support requests.

PROJECTS

Small-Office LAN & WiFi Deployment

2024

Designed and deployed a wired and wireless network for a six-device office environment.

- Installed and configured Cat5e network cabling.
- Configured a TP-Link router with DHCP reservations and SSID segmentation.
- Implemented WPA2 security and basic firewall settings.

Hardware Repair & Upgrade Projects

2023 – Present

Ongoing hardware repair and upgrade projects for residential clients.

- Diagnosed RAM failures, storage issues, overheating problems, and motherboard faults across multiple systems.
- Upgraded computers from HDD to SSD storage, significantly improving system performance.
- Performed preventive maintenance and system optimization to improve reliability and lifespan.

Personal Portfolio Website

2024

Portfolio: mutisyacollins.github.io/Portfolio

- Designed and developed a responsive portfolio website using HTML, CSS, and JavaScript.
- Implemented modern user interface components and mobile-responsive layouts.
- Deployed and maintained the website using GitHub Pages.
- Includes a downloadable CV, responsive project portfolio, technical skills showcase, and direct WhatsApp contact functionality to support professional networking and client engagement.
